Summary – Full Stack Developer

Result-driven Full Stack Web Developer with 4+ years of experience specializing in the React/Next.js ecosystem, TypeScript, and scalable cloud integrations. Proven track record of expanding and maintaining decoupled serverless backend architectures leveraging AWS (AppSync, Lambda, DynamoDB, Cognito) and delivering high-profile, provincially recognized web platforms.

Skills

- **Front-End:** React.js, Next.js, TypeScript, JavaScript (ES6+), React Native, Expo, SCSS, Tailwind CSS, shadcn/ui, HTML5/CSS3, GraphQL (Apollo Client), GSAP, Framer Motion, Lenis Scroll, Figma.
- **Back-End & Cloud:** AWS (AppSync, Lambda, DynamoDB, S3, Cognito, Amplify), Node.js, NestJS, Express.js, Prisma ORM, PostgreSQL, MongoDB, RESTful APIs, JWT Architecture, Next.js API Routes.
- **Testing:** Playwright, Zod (Schema Validation), Jest, Integration Testing, E2E Testing, Unit Testing.
- **Tools & DevOps:** CI/CD Pipelines, Git, GitHub/GitLab, Git, Webpack, NPM/Yarn, Postman, Jira.

Experience

Full Stack Developer

May 2025 – Present

Perennia. Kentville, NS

- **Led the frontend delivery** of high-profile platforms, including the provincially backed Coast to Classroom interactive application, an internal corporate CRM, and the Perennia Academy e-learning portal, driving a 55% increase in user engagement.
- **Scaled and deployed** a standardized, multi-endpoint serverless GraphQL infrastructure (AWS AppSync, Amplify) across multiple enterprise platforms, maintaining isolated microservice layers for Core CMS, SSO, and E-commerce to ensure 99.9% application uptime.
- **Designed code-first relational DynamoDB schemas** utilizing GraphQL directives (@model, @auth, @index) and optimized Global Secondary Indexes (GSIs) to fully support complex, regional data access patterns.
- **Implemented a multi-tier API security framework**, deploying custom stateless AWS Lambda Authorizers with 300s TTL caching for public endpoints alongside AWS Cognito User Pools for dynamic, user-specific JWT-token validation.
- **Engineered real-time data streaming pipelines** via Apollo Client link splitting, routing live tracking metrics over WebSockets (createSubscriptionHandshakeLink) while handling large-scale data ingestion via optimized nextToken pagination.
- **Architected highly interactive Next.js frontend systems**, orchestrating fluid UI animations with GSAP, Framer Motion, and Lenis smooth scrolling, while utilizing requestAnimationFrame constraints to maintain strict 60FPS performance.
- **Developed an enterprise-grade data orchestration grid system** (DataList) supporting multi-criteria dynamic filtering via useMemo, responsive layout toggling, and seamless AWS S3 bucket integration for secure document retrieval.

- Built rigorous backend reliability test suites using Playwright and Zod, automating schema validation and integration testing for Next.js API routes to ensure 100% payload accuracy before downstream routing

Full Stack Developer
December 2024 – April 2025

Shift Technologies Canada Inc., Toronto, ON

- **Architected an enterprise-grade AI Agent platform** using **Next.js**, **TypeScript** frontend and **Nest.js** microservices backend, containerized with Docker for CI/CD pipeline automation, resulting in a 65% reduction in call handling time.
- **Engineered communication infrastructure** by integrating **Vapi** and **Twilio APIs** for **AI-powered** call systems with natural language processing capabilities, improving data extraction accuracy by 78%.
- **Implemented multi-tier subscription** billing through **Stripe** webhooks and custom payment flow management, increasing platform revenue by 52% through optimized conversion paths.
- **Developed a responsive UI** component library utilizing **Tailwind CSS** and **shadcn/ui**, with animations via **Framer Motion**, reducing page load times by 30%.
- **Designed and maintained a RESTful API** architecture with **Nest.js**, documented through **Swagger** and tested with **Postman**, achieving 99.8% API uptime and 40% faster query response times.
- **Led cross-functional collaboration** between stakeholders and design teams to implement features according to Figma specifications, ensuring 98% design-to-code accuracy while decreasing revision cycles by 40%.

Front-End Developer
April 2024 – December 2024

SevenDot Analytics Inc., London, ON

- **Developed and launched** a comprehensive sports analytics mobile application using React Native, resulting in a 15% increase in user engagement and a 4.9/5 average store rating within the first month of release.
- **Architected and implemented** a secure billing infrastructure with embedded Apple Payment System integration, achieving a 99.9% transaction success rate while reducing checkout abandonment.
- **Enhanced user acquisition** through seamless social authentication implementation with Google, Facebook, and Apple login API protocols, decreasing registration abandonment and increasing new user conversion rates.
- **Optimized application performance** using iOS Simulator, Expo, and React Native Debugger, resulting in 40% faster load times, a 33% reduction in memory usage, and a 50% decrease in crash incidents across various device configurations.

Education

Certificates in Full Stack Web Development
November 2023 – February 2024

University of Toronto

Relevant coursework: Advanced React patterns, Node.js microservices, NoSQL database design

Hexlet, Helsinki
November 2021 – September 2022

JavaScript fundamentals, React ecosystem, UI/UX principles

Master's Degree in Automation of Technological Processes
September 2015 – June 2017

Ufa State Petroleum Technological University
